

BUY

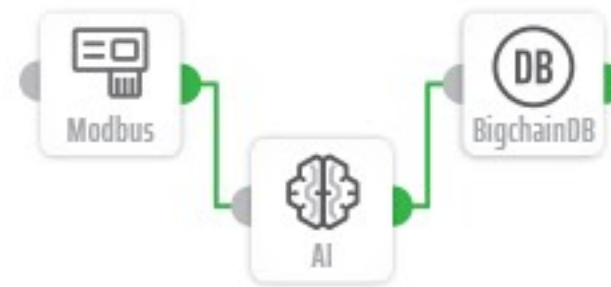

How our service works: Digital asset purchasing

Purchase all kinds of digital assets in three simple steps

1

OPEN CALL

Create an open call in a form of actionable visual script

Premade visual scripts make it easy for everyone.

Visual script defines an exact scenario how asset is collected, processed and distributed.

2

LICENSE

Apply a tailor made license

- Price
- Anonymize
- Data source
- Period

License is immutably linked with an assets and stored into the blockchain.

The control mechanism prevents asset misuse.

3

GET ASSETS

Digital assets are automatically delivered

Transaction is made only, if the digital asset matches the script and license scheme.

Every digital asset is automatically standardized and be used with other assets.
