**BUY**

How our service works: Digital asset purchasing
Purchase all kids of digital assets in three simple steps

1

OPEN CALL
Create an open call in a form of actionable visual script

Modbus   AI   BigchainDB

Premade visual scripts make it easy for everyone.

Visual script defines an exact scenario how asset is collected, processed and distributed.

2

LICENSE
Apply a tailor made license

☐ Price
☑ Anonymize
☐ Data source
☐ Period

License is immutably linked with an assets and stored into the blockchain.

The control mechanism prevents asset misuse.

3

GET ASSETS
Digital assets are automatically delivered

Transaction is made only, if the digital asset matches the script and license scheme.

Every digital asset is automatically standardized and be used with other assets.
